

Retail Analytics Data Platform

What is this platform?

Order-to-Delivery Intelligence Lakehouse Platform

What business problem does it solve?

A retail marketplace lacks unified visibility in:

- Orders
- Payments
- Deliveries
- Sellers
- Customer satisfaction

This platform consolidates data from multiple operational systems into Lakehouse architecture and provides analytics-ready datasets.

Who are the consumers?

Executive Team

Needs:

- Revenue
- Growth
- Customer Satisfaction

Operations Team
